Bistro Table

The bistro table can be used in several ways, either as a bistro table in cafeterias, as a conference table or as a Mediacom table. Its design and sturdy construction will make this table your go-to for many years.

Full Width "T" Leg
This type of base offers incomparable solidity, without stiffeners. For a distinct look, the leg can also be in a different color than the table.

Electricity
The wiring management is very subtle and is done through the end panel.

The mediacom bistro table encourages collaborative work, both on site and remotely, with its wall panel allowing the addition of a monitor.

Multiple configurations
The bistro table can be specified in different widths, lengths and heights, allowing for integration into many different types.

The wall can be made wider and higher to suit your needs. A grommet can also be specified on the front for electricity.

Electricity
The back of the wall can also be equipped with a metal frame, allowing for easy integration of electricity, with no visible hardware or wires!

Pure Elegance

Up to 192" in length, standard conference tables can welcome many participants during formal meetings. The aesthetics of this table's Fenix Matte Black combines elegance and timelessness.
